

As we wrap up the year, we want to extend a heartfelt thank-you.

Whether we connected at an event, explored a project idea, or simply shared a conversation about what's next in energy and innovation. We've appreciated every opportunity to engage with you.

At Czero, we remain passionate about advancing innovative energy technologies, developing more efficient products, and we're energized by the chance to collaborate with forward-thinking teams like yours.

Below, you'll find a few highlights from the year, projects that reflect our commitment to solving hard engineering problems with smart, sustainable solutions.

As we look to the year ahead, we're excited to keep the momentum going. If you'd like to dive deeper into an idea, revisit a conversation, or explore new possibilities, we're always just a message away.

Wishing you a joyful holiday season and a bright start to the New Year!

Guy Babbitt & Czero Team

We Collaborated on Novel Projects

NOVEL METHANOL SYNTHESIS MICROCHANNEL REACTOR

Czero partnered with Nexceris (Prime), and three other sub-awardees to support the development of e-fuels via a novel methanol synthesis microchannel reactor operating on intermittent renewables as part of an ARPA-E GREENWELLS program.

Wave Harvesting

Since 2018, Czero has been working closely with CalWave, providing engineering services to further develop their award-winning Wave Energy Converter (WEC) technology with the aid of funding by the U.S. Department of Energy (DOE).

We Celebrated 1 Year of Quixik!

This year marked the first full year of Quixik Machining & Fabrication, and we couldn't be more proud of how this team has grown. Working side by side with Czero engineers, Quixik has turned ambitious concepts into hardware faster, tighter, and with greater control over quality and cost. It's been a true partnership in problem-solving and we're just getting started.

Startups, Partnerships & Community

From Hosting Happy Hours to Cleaning Up our Community

We hosted networking events including happy hours with Activate during NREL IGF and with Colorado Cleantech and Warehouse Innovation at Forge Campus and we loved every chance to connect

with our partners and community. We also enjoy welcoming visitors into our own space in Fort Collins; if you're in town and would like a tour, we'd be happy to show you around. Closer to home, our team has been caring for our natural area behind our office, Goosehollow.

We're grateful to experience community at both large and local scales. Thank you to everyone who joined us this year, in person and virtually.

Conversations that Moved the Needle

We love digging into these questions with founders and program leaders, and we're excited to keep the conversation going in 2026.

Cleantech Open - Hardtech Problems are Different

Guy Babbitt was hosted by Ken Hayes and Ryan Hoover from

Scale for Climatech - Scale Smarter, Not Harder

Czero's team unpacked program execution for hardtech, faster

Cleantech Open to explore how to thoughtfully apply “fail fast” principles to hardtech development.

Fueling Innovation Together

At Czero, we know progress happens when the right partners come together. That's why we work alongside startups, accelerators, and funders to accelerate technology at every stage.

Where You'll Find Us in Early 2026

We're excited to kick off 2026 by connecting with the community at key events. If you'll be attending any of these or in the area, we would

love to connect!

[CES in Las Vegas - 1/6/26-1/7/26](#)

[NLR IGF in Denver, Colorado - 3/29/26-4/2/26](#)

[Colorado Climate Week in Denver, Colorado - 3/30/26-4/3/26](#)

[ARPA-E in San Diego, California - 4/7/26-4/9/26](#)

If you'll be there too, reply or grab time on [our calendar](#) - we'd love to say hello.
